

BEYOND THE BINARY II

ECOSYSTEM SERVICES

Every weed
growing in a
city, native
or not, is
doing
something.

absorbing
stormwater

building
soil

sequestering
carbon

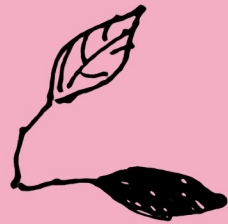

drawing toxins
from
the ground

erosion
control

FLIP

cooling
the
air

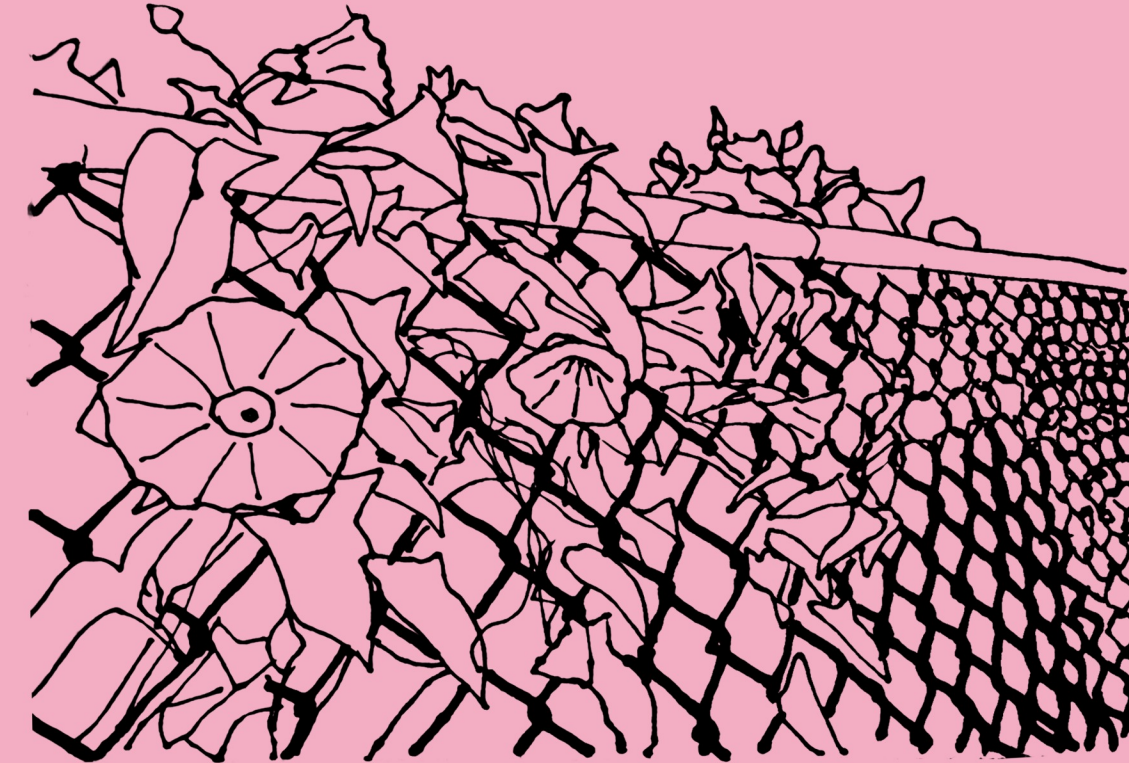

reducing
noise
pollution

purifying
the
air

feeding
pollinators

providing
habitat

In a
neighborhood
with little green
space, a verdant
vacant lot is a
meadow and
an oasis.
